BUILD, INTEGRATE & AUTOMATE DOCUMENT FLOWS

xDPRO
Smart B2B integration platform™

Enterprise Business Process Engine

xDPRO is a powerful and modular document processing platform. xDPRO offers the tools for managing processes (rather than tasks) to improve business performance outcomes and operational agility. Processes span organizational boundaries, linking together documents, information flows, and systems to create and deliver value. Examples are: inserting documents in an ERP, saving document information in databases, converting file formats, archiving documents, inserting extracted data into SAP workflows, and much more.

Multi-purpose modular, "Lego-like" product architecture

xDPRO consists of a modular product architecture: different components can be pieced together differently for various purposes. xDPRO "workers" are similar to Lego pieces, and can be assembled together in many ways to handle diverse digital document processing scenarios. Speaking

figuratively, xDPRO is the conveyor belt that transfers the documents through the software. Individual tools called workers retrieve the documents from the conveyer belt, process them one by one, and then return them to be processed by the next worker or application. The last tool in the pipeline generally removes the document from the conveyer belt. Depending on the configuration, xDPRO can contain various different workers to implement different kinds of document processing, and further tools can be added as required.

The web application called xDPRO Monitor displays the status of all document processing scenarios and its workers. xDPRO Web App also provides access to (optional) document audit trail.

**BUILD, INTEGRATE &
AUTOMATE
DOCUMENT FLOWS**

xDPRO
Smart B2B integration platform™

**Practical applications for
xDPRO, a few scenarios**

- ✓ Extract 100% accurate data from 'digital PDF' files and transform to a structured data file format
- ✓ Transform structured data files to other formats (XML, cXML, UBL2, CSV, JSON, ISDOC, …)
- ✓ Convert TIFF, JPG, PNG, PDF and PDF/A formats
- ✓ Archive documents
- ✓ Insert references to SAP ERP or other target systems
- ✓ Automated processing of PDF invoices received via email in conjunction with OCR
- ✓ Insert extracted data into SAP workflow solutions such as OpenText VIM
- ✓ Batch-import documents
- ✓ Integrate scanning processes with SAP ERP

BUILD, INTEGRATE & AUTOMATE DOCUMENT FLOWS

xDPRO

Smart B2B integration platform™

xDPRO benefits at a glance

- ✓ Easily build and automate document flows between business partners necessitating different file format, protocols and transfer methods.
- ✓ Quickly create B2B entry points to integrate unconnected information sources, databases and applications across your business, customers, suppliers and partners.
- ✓ Integrate a wide variety of document formats, using an easy-to-use EDI platform which supports multiple standards.
- ✓ Easily convert EDI, e-invoicing, and text PDF files to other formats

XCENTER DIGITAL ("XCD") drives digital finance transformation thru Procure-to-Pay and Enterprise Content Management (ECM) services and solutions. Alongside our proprietary products, we offer core competences in OpenText, SAP and UiPath technologies. Incepted in 2008, we have delivered in excess of 250 enterprise projects, pro-actively manage services for over 40 blue-chip clients on an ongoing basis, and help buyers and suppliers digitize their Procure-to-Pay processes with innovative products that facilitate smart electronic invoicing, and bridge the gap to RPA 2.0's "unassisted bot".
